This report involved in completing the "WeRateDogs" project as part of Udacity's Data Analysis professional Nanodegree. With FWD-Egypt

Question 1: What is average for retweet count and fovourites count for dog stage?

i found doggo-puppo have the most count in both retweet and favourites.Which indicates the extent of its love and spread among dog breeders and their lovers, i insight it with numbers and visualise it with bar graph.
I am sure that there is an unusual loving relationship between dog breeders and their dogs, which makes them proud of them and their pictures, and they share these beautiful pictures and moments with others

Question 2:what is most prediction of dogs there most tweeted about ?

As we know, there are many who participated, but without a competitor, there are two types that are close to the farthest borders, Labrador_retriever, golden_retriever .The prediction retriever They sit on the throne. Those are the most tweeted about

Question 3: is there relationship between favourites and retweet ?

I found when retweets increase the favourite increase there are positive and strong relathionship between them ,because more retweet make it reach to more people Which leads to a greater likelihood of being liked.
the Scatter plot show us this .

Question 4: What is most source in used for twitter ?

It was an amazing sweep for iphone
the pie chart show that's Without the slightest doubt .
I do not know is this normal with the mobile or there is a relationship between Twitter and the iPhone, but this is not our position here . The important here i phone the most source , with 98% .
